Why You Lose Decoded

The game of Blackjack is not complicated. There are not very many rules. The rules that they do have are easy to understand and not hard to learn. There are countless books written to teach you all you need to know to quit that 9-5 job and head off to the casino and make a fortune. Do you ever wonder why most people lose when they play, then? The game is not difficult. There are experts everywhere to tell you how to win. Yet, when most people leave the casino they leave with less money than they went with.

Stop Looking For Silver Bullets

The reason why most people lose money playing blackjack is that they spend all of their time trying to find ways to win. It could be card counting or some betting system. They are all designed to be some silver bullet on how to win. My approach is different. I have spent hundreds of hours analyzing why people lose money, not trying to figure out a way to win. If you understand why you lose, you increase your chances of losing less and thus, winning more.

Blackjack is a Simple Game

There are many reasons players lose at the table. I have come up with my top ten reasons that have been tested and proven, and explained each in some detail. I believe if you limit your mistakes, figure out why you are losing; it will go a long way in making your winning evenings even bigger. And better yet, turn your losing evenings into winning ones.

Good luck to all and happy hunting!!!!!!
