Botany in a Day: The Patterns Method of Plant Identification Thomas J. Elpel

Botany in a Day, now available in a full-color version, is the plant identification method that thousands have used and learned.

Looking for a faster, easier, and engaging way to identify plants? Related plants have similar characteristics, and they often have similar uses. Rather than learning new plants one-at-a-time, it is possible to learn them by the hundreds, based on plant family patterns.

Each family of related plants has unique patterns for identification. Learn to recognize these patterns, and discover them again and again in the plants you encounter. It is possible to instantly recognize a plant never before seen, and in many cases, to know its edible or medicinal properties on the spot-even before you have identified it down to the species!

Botany in a Day is changing the way people learn about plants. A one-day tutorial introduces eight of the world's most common plant families, applicable to more than 45,000 species of plants. Master these eight patterns and have the skills to recognize an astonishing number of plants on any continent. Add to your repertoire by keying out entirely unknown plants and learning additional family patterns.

Botany in a Day is principally written for North America, but used and adored by readers all over the world. It is used as a textbook in numerous universities, high schools, and herbal schools. This book is widely used in nature programs and promoted in national parks. *Botany in a Day* is your passport connection to nature and discovering the amazing world of plants!
