Data Mining - Methoden in Der Simulation (German Edition) Enrico Seib

Bachelorarbeit aus dem Jahr 2008 im Fachbereich Informatik - Wirtschaftsinformatik, Note: 1,0, Universität Rostock (Institut für Informatik, Lehrstuhl für Modellierung und Simulation), 100 Quellen im Literaturverzeichnis, Sprache: Deutsch, Abstract: Principles and methods of data mining are a widespread area, i.e. retail dealer use data mining tools to analyze the behavior of customers, computer hardware supplier use data mining to optimize their inventory. There are multiple possibilities of using data mining techniques, even in technical and scientific areas of applications. In regard of manifold fields of application, there are no less than the number of techniques and methods for Data Mining in existence. Another field to apply Data Mining technique is the domain of simulation. Simulation is the computer-based approach of executing and experimenting of and with models. One aim of this thesis is to analyze data mining tools to see how capable they are solving data mining duties with respect to data calculated by simulation. Different data mining tools are analyzed, commercial tools like SPSS and SPSS Clementine as well as established and freely available tools like WEKA and the R-Project. These tools are analyzed in matters of their data mining functionalities, options to access different data sources, and their complexity of different data mining algorithms. Beyond the analysis of data mining tools with respect to functionality and simulation, environments for modeling and simulation are analyzed with respect to their possibilities of the utilization for data mining. These environments are the commercial tools Arena and Any-Logic and the freely available SeSam-Project. The effect of all processes of analyzing is a ranking of commonly used data mining techniques and concepts. The second part of the thesis occupies with the problem, which data mining method or technique is useful to analyze data provided by a simulation process. It also concerns in which wa

From reader reviews:

Martin McDaniel:

Now a day folks who Living in the era where everything reachable by talk with the internet and the resources inside it can be true or not require people to be aware of each details they get. How many people to be smart in acquiring any information nowadays? Of course the correct answer is reading a book. Examining a book can help folks out of this uncertainty Information especially this Data Mining - Methoden in Der Simulation (German Edition) book since this book offers you rich data and knowledge. Of course the info in this book hundred % guarantees there is no doubt in it you may already know.

Helen McCleary:

The book untitled Data Mining - Methoden in Der Simulation (German Edition) is the publication that recommended to you you just read. You can see the quality of the reserve content that will be shown to a person. The language that publisher use to explained their ideas are easily to understand. The article author was did a lot of research when write the book, to ensure the information that they share to you is absolutely accurate. You also could possibly get the e-book of Data Mining - Methoden in Der Simulation (German Edition) from the publisher to make you far more enjoy free time.

Robert Auclair:

Do you like reading a publication? Confuse to looking for your best book? Or your book had been rare? Why so many concern for the book? But virtually any people feel that they enjoy with regard to reading. Some people likes reading, not only science book and also novel and Data Mining - Methoden in Der Simulation (German Edition) or even others sources were given understanding for you. After you know how the good a book, you feel need to read more and more. Science book was created for teacher or maybe students especially. Those books are helping them to put their knowledge. In additional case, beside science e-book, any other book likes Data Mining - Methoden in Der Simulation (German Edition) to make your spare time more colorful. Many types of book like this.

Ronna Rutledge:

What is your hobby? Have you heard that will question when you got scholars? We believe that that query was given by teacher for their students. Many kinds of hobby, Everybody has different hobby. And you know that little person similar to reading or as examining become their hobby. You need to understand that reading is very important in addition to book as to be the point. Book is important thing to include you knowledge, except your personal teacher or lecturer. You find good news or update in relation to something by book. Many kinds of books that can you take to be your object. One of them are these claims Data Mining - Methoden in Der Simulation (German Edition).
