Signal Processing Applications in Cdma Communications (Artech House Mobile Communications Series) Hui Liu

This manual contains a comprehensive description of signal processing treatments for wideband CDMA to help engineers improve system performance. Based upon the author's in-depth research of key CDMA signal processing issues, the book features complete signal processing solutions, and should help professionals to design high performance receivers for next generation wideband CDMA networks. It addresses critical issues such as multiple access interference in a mobile environment and how to save bandwidth.
