Captains and the Kings is the saga of young Joseph Armagh, recently of Ireland, who promised his dying mother to care for his younger siblings. Landing in Boston, Joseph's determination carries him through years of shady-deal making and his gradual accumulation of wealth and power. In this work, Caldwell takes on the global power brokers. Running through the story line is a description of the way the international financiers and industrialists (all private consortiums owned by an elite of the world's richest families and persons) hijack governments around the globe; instigating wars and gaining control over the warring countries through manipulation of the enormous debts incurred during a war.
