Lectures on Quasiconformal Mappings (University Lecture Series)

Lars V. Ahlfors

Lectures on Quasiconformal Mappings (University Lecture Series) Lars V. Ahlfors
Lars Ahlfors' Lectures on Quasiconformal Mappings, based on a course he gave at Harvard University in the spring term of 1964, was first published in 1966 and was soon recognized as the classic it was shortly destined to become. These lectures develop the theory of quasiconformal mappings from scratch, give a self-contained treatment of the Beltrami equation, and cover the basic properties of Teichmuller spaces, including the Bers embedding and the Teichmuller curve. It is remarkable how Ahlfors goes straight to the heart of the matter, presenting major results with a minimum set of prerequisites. Many graduate students and other mathematicians have learned the foundations of the theories of quasiconformal mappings and Teichmuller spaces from these lecture notes. This edition includes three new chapters.The first, written by Earle and Kra, describes further developments in the theory of Teichmuller spaces and provides many references to the vast literature on Teichmuller spaces and quasiconformal mappings. The second, by Shishikura, describes how quasiconformal mappings have revitalized the subject of complex dynamics. The third, by Hubbard, illustrates the role of these mappings in Thurston's theory of hyperbolic structures on 3-manifolds. Together, these three new chapters exhibit the continuing vitality and importance of the theory of quasiconformal mappings.

From reader reviews:

Neil Williams:

Why don't make it to become your habit? Right now, try to prepare your time to do the important action, like looking for your favorite reserve and reading a e-book. Beside you can solve your problem; you can add your knowledge by the publication entitled Lectures on Quasiconformal Mappings (University Lecture Series). Try to stumble through book Lectures on Quasiconformal Mappings (University Lecture Series) as your good friend. It means that it can being your friend when you truly feel alone and beside regarding course make you smarter than ever before. Yeah, it is very fortuned in your case. The book makes you much more confidence because you can know almost everything by the book. So , let's make new experience in addition to knowledge with this book.

Sandra McNulty:

Have you spare time to get a day? What do you do when you have a lot more or little spare time? That's why, you can choose the suitable activity with regard to spend your time. Any person spent their spare time to take a stroll, shopping, or went to the Mall. How about open or read a book titled Lectures on Quasiconformal Mappings (University Lecture Series)? Maybe it is to get best activity for you. You know beside you can spend your time using your favorite's book, you can smarter than before. Do you agree with it has the opinion or you have different opinion?

Kristy Abrahams:

What do you think of book? It is just for students because they're still students or this for all people in the world, exactly what the best subject for that? Just you can be answered for that query above. Every person has several personality and hobby for every other. Don't to be pressured someone or something that they don't need do that. You must know how great in addition to important the book Lectures on Quasiconformal Mappings (University Lecture Series). All type of book would you see on many methods. You can look for the internet resources or other social media.

Elaine Gold:

A lot of people always spent all their free time to vacation or go to the outside with them family members or their friend. Do you realize? Many a lot of people spent many people free time just watching TV, or maybe playing video games all day long. If you want to try to find a new activity honestly, that is look different you can read a new book. It is really fun for yourself. If you enjoy the book which you read you can spent the whole day to reading a guide. The book Lectures on Quasiconformal Mappings (University Lecture Series) it is quite good to read. There are a lot of people that recommended this book. We were holding enjoying reading this book. Should you did not have enough space bringing this book you can buy the actual e-book. You can m0ore effortlessly to read this book from a smart phone. The price is not too costly but this book offers high quality.
