Dongdong Gu

Laser Additive Manufacturing of High-Performance Materials Dongdong Gu

This book entitled “Laser Additive Manufacturing of High-Performance Materials” covers the specific aspects of laser additive manufacturing of high-performance new materials components based on an unconventional materials incremental manufacturing philosophy, in terms of materials design and preparation, process control and optimization and theories of physical and chemical metallurgy. This book describes the capabilities and characteristics of the development of new metallic materials components by laser additive manufacturing process, including nanostructured materials, *in situ* composite materials, particle reinforced metal matrix composites, etc. The topics presented in this book, similar as laser additive manufacturing technology itself, show a significant interdisciplinary feature, integrating laser technology, materials science, metallurgical engineering and mechanical engineering. This is a book for researchers, students, practicing engineers and manufacturing industry professionals interested in laser additive manufacturing and laser materials processing. Dongdong Gu is a Professor at College of Materials Science and Technology, Nanjing University of Aeronautics and Astronautics (NUAA), PR China.

From reader reviews:

Donna Cook:

Book is definitely written, printed, or outlined for everything. You can learn everything you want by a guide. Book has a different type. To be sure that book is important factor to bring us around the world. Alongside that you can your reading proficiency was fluently. A e-book Laser Additive Manufacturing of High-Performance Materials will make you to possibly be smarter. You can feel more confidence if you can know about every thing. But some of you think in which open or reading any book make you bored. It is far from make you fun. Why they are often thought like that? Have you seeking best book or acceptable book with you?

Ernest Poole:

Do you among people who can't read gratifying if the sentence chained in the straightway, hold on guys that aren't like that. This Laser Additive Manufacturing of High-Performance Materials book is readable simply by you who hate those straight word style. You will find the info here are arrange for enjoyable examining experience without leaving even decrease the knowledge that want to deliver to you. The writer connected with Laser Additive Manufacturing of High-Performance Materials content conveys prospect easily to understand by many individuals. The printed and e-book are not different in the written content but it just different by means of it. So , do you nonetheless thinking Laser Additive Manufacturing of High-Performance Materials is not loveable to be your top listing reading book?

Diane McCarthy:

The reserve with title Laser Additive Manufacturing of High-Performance Materials has lot of information that you can learn it. You can get a lot of benefit after read this book. This kind of book exist new expertise the information that exist in this e-book represented the condition of the world right now. That is important to yo7u to be aware of how the improvement of the world. This kind of book will bring you with new era of the glowbal growth. You can read the e-book on the smart phone, so you can read that anywhere you want.

Bonnie Pace:

Playing with family in a park, coming to see the water world or hanging out with good friends is thing that usually you could have done when you have spare time, in that case why you don't try thing that really opposite from that. A single activity that make you not sense tired but still relaxing, trilling like on roller coaster you are ride on and with addition info. Even you love Laser Additive Manufacturing of High-Performance Materials, you can enjoy both. It is great combination right, you still desire to miss it? What kind of hang type is it? Oh can occur its mind hangout people. What? Still don't get it, oh come on its identified as reading friends.
