Climate Change Denial: Heads in the Sand

Haydn Washington, John Cook

Climate Change Denial: Heads in the Sand Haydn Washington, John Cook

Humans have always used denial. When we are afraid, guilty, confused, or when something interferes with our self-image, we tend to deny it. Yet denial is a delusion. When it impacts on the health of oneself, or society, or the world it becomes a pathology. Climate change denial is such a case. Paradoxically, as the climate science has become more certain, denial about the issue has increased. The paradox lies in the denial. There is a denial industry funded by the fossil fuel companies that literally denies the science, and seeks to confuse the public. There is denial within governments, where spin-doctors use 'weasel words' to pretend they are taking action. However there is also denial within most of us, the citizenry. We let denial prosper and we resist the science.

Climate Change Denial explains the social science behind denial. It contains a detailed examination of the principal climate change denial arguments, from attacks on the integrity of scientists, to impossible expectations of proof and certainty to the cherry picking of data. Climate change can be solved – but only when we cease to deny that it exists. This book shows how we can break through denial, accept reality, and thus solve the climate crisis. It will engage scientists, university students, climate change activists as well as the general public seeking to roll back denial and act.

From reader reviews:

Jose Shepard:

Book is actually written, printed, or outlined for everything. You can know everything you want by a guide. Book has a different type. As we know that book is important issue to bring us around the world. Next to that you can your reading skill was fluently. A book Climate Change Denial: Heads in the Sand will make you to end up being smarter. You can feel far more confidence if you can know about almost everything. But some of you think that will open or reading a new book make you bored. It is not make you fun. Why they could be thought like that? Have you searching for best book or ideal book with you?

Kevin Miller:

Nowadays reading books be than want or need but also turn into a life style. This reading practice give you lot of advantages. Advantages you got of course the knowledge the rest of the information inside the book this improve your knowledge and information. The knowledge you get based on what kind of guide you read, if you want have more knowledge just go with education books but if you want really feel happy read one having theme for entertaining like comic or novel. The actual Climate Change Denial: Heads in the Sand is kind of book which is giving the reader capricious experience.

Cami Raley:

As a student exactly feel bored to reading. If their teacher expected them to go to the library in order to make summary for some reserve, they are complained. Just very little students that has reading's heart or real their pastime. They just do what the professor want, like asked to go to the library. They go to generally there but nothing reading significantly. Any students feel that reading through is not important, boring in addition to can't see colorful photos on there. Yeah, it is for being complicated. Book is very important in your case. As we know that on this age, many ways to get whatever we would like. Likewise word says, many ways to reach Chinese's country. Therefore , this Climate Change Denial: Heads in the Sand can make you sense more interested to read.

Robert Lofton:

Reading a reserve make you to get more knowledge from the jawhorse. You can take knowledge and information from a book. Book is composed or printed or descriptive from each source in which filled update of news. In this modern era like currently, many ways to get information are available for anyone. From media social similar to newspaper, magazines, science guide, encyclopedia, reference book, story and comic. You can add your understanding by that book. Do you want to spend your spare time to spread out your book? Or just searching for the Climate Change Denial: Heads in the Sand when you necessary it?
